

Web Hosting from Network Solutions®

Network Solutions provides robust Web hosting to support high traffic, high content Web sites needing ample disk storage and data transfer capacity. All hosting packages come with multiple FTP accounts, numerous e-mailboxes, Web site traffic reports, and a free domain name with annual purchase. And with a 99.9% uptime rating backed by Network Solutions® award-winning customer service, you can count on us to provide the reliability and support you need.

How does it work?

Start by choosing the Web Hosting package that best meets your needs:

Standard

Ideal for those just starting to build their Web presence. The plan comes with 7GB of disk space, 150GB of monthly data transfer, and 50 e-mailboxes.

Advanced

The ultimate solution for those wishing to expand their Web presence or meet the growing needs of their customers. It boasts 15GB of disk space, 400GB of monthly data transfer and 100 e-mailboxes.

Pro

Everything you need to handle high traffic, high volume and high sales (e-commerce). This package includes 30GB of disk space, 500GB of monthly data transfer, 15 FTP accounts and 200 e-mail boxes.

What will it do for you?

Provide tools needed for the advanced user. Network Solutions Web hosting includes the tools you need to build and maintain a professional Web site. Work with your preferred design software or use our online Web site creator tool.

Help you get found online. Search engine submission and optimization tools are also included with every Network Solutions Web hosting package, which will help your Web site get found online.

Provide peace of mind. Trust Network Solutions to manage your Web hosting with around-the-clock reliability. Our state of the art data center ensures your Web site remains trouble free and our 24/7 Real-Person Customer Service™ is just a phone call away. Useful features like “backup and restore” give you peace of mind knowing your Web site data is retrievable at will.

Manage your Web Hosting service through our easy-to-use Hosting Control Panel.

Web Hosting Features

What does Web Hosting include?

What does it mean for me?

Disk Space

Disk space contains HTML files, graphics, audio clips, e-mail, and any other files that make up your Web site.

All Network Solutions Web hosting packages include an ample amount of disk space to enable you to build a professional Web site without concern about exceeding your disk space quota.

Data Transfer

Data transfer is also known as Web traffic or bandwidth. When visitors access a Web page, data is sent from our Web servers to your visitor's computer. The transfer of these files generates traffic. Your total transfer is the sum of all in-and-out-bound traffic. The more visitors you have, the higher your data transfer needs will be.

Data transfer is the lifeblood of your online business. With up to 500 GB of monthly data transfer available on our Pro hosting package, the likelihood of exceeding your monthly data transfer limit is greatly reduced.

File Transfer Protocol (FTP)

FTP is a software protocol for exchanging information between computers over a network.

FTP allows you to easily upload files and custom pages to your Web site.

E-Mail

All Network Solutions Web hosting packages come with secure, reliable and professional e-mailboxes including 500MB of storage per box and Symantec Brightmail® virus scanning & spam protection. Advanced e-mail features including POP3 and SMTP functionality, three e-mail aliases per box, unlimited e-mail forwarding, and one Catch-All e-mailbox are included with the Advanced and Pro Web Hosting packages.

Providing a business e-mail solution to your team can be expensive, not to mention time consuming. Our complete e-mail service allows you to focus on your business rather than worry about your e-mail system. Having a professional e-mail to communicate with your customers helps you promote yourself with a personalized e-mail address like orders@janesbagels.com.

24/7 Real-Person Customer Service™

Around-the-clock answers to your questions.

Help is only a phone call or chat session away.

Web Site Design

Upload your Web site using popular programs such as Dreamweaver® or FrontPage®, or create and update your Web site online using our ImageCafé Web Site Creator tool.

Whether you use your own software or our included Web site design tool, you can make unlimited updates to your Web site.

Free Domain Name

Free domain name with annual purchase of a Web Hosting package. Free domain name is available for new domain registration, domain renewals and domain transfers of .com, .net, .org, .us, .biz, .info & .name extensions.

You save \$34.99 compared to the standard annual purchase price.
